

2025 Street Rehabilitation Project Update

City of Lakeville Public Works 

Construction Update

Private Features in City Right-of-Way

If you wish to protect private features from damage during construction, please temporarily remove them from the City right-of-way. At a minimum you should locate and mark all private underground features such as irrigation heads and dog fences. While this can help to mitigate damage to those systems, it is expected damage will occur if they are located in the City right-of-way where the contractor is working.

[Watch this video demonstrating areas impacted by construction.](#)

[Get the most up-to-date construction schedule.](#) A phasing map will be available soon.

Phase 1 - Glacier Way (project start delayed due to safety improvements at Cedar Avenue and Glacier Way)

- **Week of July 7:** The contractor will continue curb removals and start concrete installation for curb, sidewalk and pedestrian ramps. Patching in front of new curb will start later in the week.
- **Week of July 14:** Bituminous driveways will be patched. Milling of the road surface will start with utility adjustments occurring later in the week.

If individual driveways are impacted by construction, residents will be notified via door hanger to discontinue use and for how long.

Please be cautious and reduce vehicle speeds when approaching crews working in the roadway. Construction personnel will notify drivers, via hand signals, when it is safe to pass around moving equipment.

Further updates will be provided as the project progresses.

Contact Jon Muma, the City Construction Representative, at 952-985-2795 or jmuma@lakevillemn.gov for more information.
