

## 2025 Street Rehabilitation Project Update

City of Lakeville Public Works 

# Construction Update

### Private Features in City Right-of-Way

**If you wish to protect private features from damage during construction, please temporarily remove them from the City right-of-way.** At a minimum you should locate and mark all private underground features such as irrigation heads and dog fences. While this can help to mitigate damage to those systems, it is expected damage will occur if they are located in the City right-of-way where the contractor is working.

[Watch this video demonstrating areas impacted by construction.](#)

[Get the most up-to-date construction schedule.](#) A phasing map will be available soon.

### Phase 1 - Glacier Way (project start delayed due to safety improvements at Cedar Avenue and Glacier Way)

- **Week of June 30:** The contractor will set up both traffic control and erosion control on Glasgow Avenue. Saw cutting and removals for storm sewer work will occur, and storm sewer work will begin on Glasgow Avenue. Curb removals will start later in the week.
- **Week of July 7:** Curb removals will continue early in the week with new curb to be poured mid- to late week.

If individual driveways are impacted by construction, residents will be notified via door hanger to discontinue use and for how long.

Please be cautious and reduce vehicle speeds when approaching crews working in the roadway. Construction personnel will notify drivers, via hand signals, when it is safe to pass around moving equipment.

Further updates will be provided as the project progresses.

**Contact Jon Muma, the City Construction Representative, at 952-985-2795 or [jmuma@lakevillemn.gov](mailto:jmuma@lakevillemn.gov) for more information.**
