

2025 Street Rehabilitation Project Update

City of Lakeville Public Works 

Construction Update

Private Features in City Right-of-Way

If you wish to protect private features from damage during construction, please temporarily remove them from the City right-of-way. At a minimum you should locate and mark all private underground features such as irrigation heads and dog fences. While this can help to mitigate damage to those systems, it is expected damage will occur if they are located in the City right-of-way where the contractor is working.

[Watch this video demonstrating areas impacted by construction.](#)

[Get the most up-to-date construction schedule.](#) A phasing map will be available soon.

Phase 1 - Glacier Way

- **Week of June 9:** The contractor will be setting up both traffic and erosion control starting on Glacier Way. Sawcutting and removals for storm sewer work will occur. Storm sewer work will begin late in the week.

If individual driveways are impacted by construction, residents will be notified via door hanger to discontinue use and for how long.

Please be cautious and reduce vehicle speeds when approaching crews working in the roadway. Construction personnel will notify drivers, via hand signals, when it is safe to pass around moving equipment.

Further updates will be provided as the project progresses.

Contact Jon Muma, the City Construction Representative, at 952-985-2795 or jmuma@lakevillemn.gov for more information.
